

DATASHEET

Thermal Protector L06

Type series 06

Construction and function

Switchgear consisting of a mobile and circular contact bridge (1), a contact bearing pin (2), a spring snap-in disc (3) and a bimetallic disc (4) which is riveted into one another, undetachable and fixed in a positive lock and self-aligning between a non-conductive floor of a housing (5) and an insulating ceramic bearing (6) with two integrated stationary contacts (7) as electrodes. At the same time, the switchgear is supported by the spring snap-in disc (3) with the contact bridge (1) acting as a transfer element for electric current which is held between a supporting collar and a circumferential ring. As such, the bimetallic disc (4) underlying it, that is also stuck out from the contact bearing pin (2), can continuously work (exposed) by mechanical loads without the contact pressure defined by the spring snap-in disc (3) diminishing. As soon as the bimetallic disc (4) reaches its rated switching temperature, it effectively springs against the throw force of the spring snap-in disc (3) into its inverted position. The contacts are abruptly opened. The temperature will now fall. The bimetallic disc (4) will only snap back upon reaching a defined reset temperature and the contacts will be closed again. As the contact bearing pin (2) is appropriately dimensioned, an easy, circular rotation of the circle-shaped contact bridge (1) is enabled with every switch so that transfer resistances remain constantly below the minimum limit after many switch cycles and the long term stability is sustained even under high levels of stress.

Features:

Small dimensions	to fit closely built-up circuits
Quick response sensitivity	featured by small protector mass and excellent heat transfer from the metal-housing to the bimetallic disc
Excellent long term performance	due to instantaneous switching, fine-silver contacts, constant contact resistance and to electrically as well as mechanically unstressed bimetallic disc, reproducible switching temperature values
Very short bouncing times	< 1 ms
Instantaneous switching	with always constant contact pressure up to the nominal switching point, resulting in low contact stress
Temperature resistance	by use of high temperature resistant materials and components

L06

Diameter d	10,0 mm
Installation height h	from 5,0 mm
Thread/Length	M4 x 5,0 mm
Width across flats/ Max. torque	10,0 mm / 2 Nm

Type: Normally closed; resets automatically; with connector cables; with epoxy; fully insulated in a screw on housing

Nominal switching temperature (NST) in 5 °C increments		70 °C - 200 °C
Tolerance (standard)		±5 K
Reverse switch temperature (RST) below NST (defined RST is possible at the customer's request)	UL VDE	-35 K ±15 K ≥ 35 °C
Installation height		from 5,0 mm
Diameter		10,0 mm
Thread/Length		M4 x 5,0 mm
Width across flats/Max. torque		10,0 mm / 2 Nm
Resistance to impregnation *		suitable
Suitable for installation in protection class		I + II
Pressure resistance to the switch housing *		600 N
Standard connection		Lead wire 0,75 mm ² / AWG18
Available approvals (please state)	IEC; ENEC; VDE; UL; CSA; CQC	
Operational voltage range AC/DC		up until 500 V AC / 28 V DC
Rated voltage AC		250 V (VDE) 277 V (UL)
Rated current AC cos φ = 1.0/cycles		10,0 A / 10.000
Rated current AC cos φ = 0.6/cycles		6,3 A / 10.000
Max. switching current AC cos φ = 1.0/cycles		25,0 A / 2.000
Rated voltage DC		24 V
Max. switching current DC/cycles		40,0 A / 10.000
High voltage resistance		2,0 kV
Total bounce time		< 1 ms
Contact resistance (according to MIL-STD. R5757)		≤ 50 mΩ

Current sensitivity characteristic at I_{nom}:

dependent of...

- Thermal coupling
- Application area
- Built-in conditions
- Built-in conditions
- Wiring length / wiring diameter

Ordering example:

Marking example:

More varieties of the type series 06:

- C06 – with connector cables; with epoxy; without insulation
- S06 – with connector cables; with epoxy; insulation: Mylar®-Nomex®
- P06 – with connection pins; with epoxy; fully insulated in the attachment housing
- V06 – with connector cables and double-insulated in the attachment housing
- B06 – with connector cables; with epoxy; fully insulated in a Ryton® cap
- F06 – with connector cables; with epoxy; fully insulated in a Nomex® cap
- C06HT – with connector cables; silicone coated; without insulation
- S06HT – with connector cables; silicone coated; insulation: PTFE
- H06 – with connector cables; with epoxy; fully insulated in the attachment housing
